

# ANDREA NEEDS OUR HELP TO CONQUER CANCER

**Hi, my name is Andrea (Demetriou) Kalliaras. My family and I are members of Saint Nicholas Greek Orthodox Church in Wyckoff, NJ. I am 49 years old. My husband Constantinos (Gus) and I are proud parents to two young teens, Sophia and Nikolas.**

**A few months ago, I received devastating news that I have a rare form of Leukemia that can only be cured by a stem cell transplant. Unfortunately, at this point, the doctors have not found a match for me and so we are now praying for the generosity of others and reaching out to our fellow community. My mom, Fannie is Cypriot, and my dad John is Greek and Cypriot. So, we are looking for anyone that is of Greek or Cypriot descent, however, on occasion, matches are found between patients and donors of different ethnic groups.**

**Eligibility will vary based on the cooperative registry guidelines. Use the links to determine your eligibility.**

- In good health
- Willing to donate blood stem cells to any patient in need

**There are two ways to donate blood stem cells:**

80% of donors are asked to provide blood stem cells collected from circulating blood. This is an out-patient peripheral blood stem cell (PBSC) donation. It is similar to donating platelets or plasma.

20% of donors are asked to provide blood stem cells collected from bone marrow. The blood stem cells are withdrawn from the donor's pelvic bone.
